

PRABGUN MOKHA

INNOVATIVE AI INTERN

Delhi, India 110026 | 9810401778 | prabgunmokha@gmail.com

WORK EXPERIENCE

**Sukrit Technologies
Pvt Ltd**
Remote
Feb 2026 – Jul 2026

Artificial Intelligence Intern

- Applied AI techniques to software development workflows, gaining hands-on experience with AI-assisted coding and practical software engineering.
- Collaborated with Project Manager (Full Stack Development) to understand requirements, design features, and align AI development with project objectives.
- Implemented and tested software solutions while exploring AI-assisted development tools for coding, debugging, and code review.
- Contributed to improving development processes by applying AI-based methods to implementation, testing, and iterative refinement.

IBM
Delhi
Jun 2025 – Jul 2025

AI & Data Science Intern — Poverty Signal Detection

- Translated raw survey and socioeconomic data into meaningful insights using statistical techniques.
- Built visualizations that enabled stakeholders to quickly interpret results from complex analyses.
- Generated reports summarizing model performance evaluation results.

EDUCATION

**Dr. Akhilesh Das
Gupta Institute of
Professional Studies**
New Delhi | 2023 –
2027

**Bachelor of Technology — Artificial Intelligence and
Data Science (AIDS)**

**Bal Bharati Public
School**
New Delhi | 2023

High School Diploma (Science PCM + CS)

FEATURED PROJECTS

CognifyX
Nov 2025

Adaptive AI Tutor (ML Deployment)

- Developed an adaptive learning platform that personalizes educational assistance using machine learning based on individual learner needs.

CyberTwin
Oct 2025

Network Intelligence Platform (Threat Intelligence)

- Built a network intelligence platform in Python that analyzes network activity in real time for security monitoring.

INDEPENDENT PROJECTS (GITHUB)

securescans-ai
[Python](#), [Streamlit](#)

Cybersecurity Threat Detection Engine

- Built a threat detection engine scanning text for leaked credentials, PII, SQL injection, and 16 total threat types with automated risk scoring.
- Implemented remediation suggestions and interactive charting packaged as a deployable Python tool.

Fortify-Docs-API
[Python](#), [FastAPI](#)

Document Security API

- Developed a stateless FastAPI service for securing PDFs and images, featuring dynamic conversion and permission controls.

File-Reader
[Python](#), [LLMs](#)

LLM Document Q&A; Tool

- Built a tool that ingests files and answers natural-language questions about contents using LLM integration.

langgraph-issue-solver
[Python](#), [LangGraph](#), [LangChain](#)

LLM Agent for Issue Resolution

- Built an LLM agent using LangGraph to analyze and resolve repository issues, applying agentic workflow design.

nmap-portscan
[Python](#), [Nmap](#)

Network Port Scanning Tool

- Developed a Python-based wrapper around Nmap for automated network port scanning and reconnaissance.

PUBLICATIONS

EPRA IJMR
Vol. 11, Issue 11

An AI-Driven Approach to Cybersecurity: Using LLMs for Threat Detection and Analysis

- Published research paper exploring AI-driven cybersecurity trends and practical security applications in EPRA IJMR.
