EDUCATION

B.Tech - AI & Data Science

Dr. Akhilesh Das Gupta Institute of Professional Studies, New Delhi
Expected 2027

High School Diploma

Bal Bharati Public School, New Delhi
2023

SKILLS

- Python, Java, C, C++
- FastAPI, REST APIs, SQL
- LangGraph, LangChain, LLMs
- Machine Learning, NLP, RAG
- Data Analysis, Visualization
- Cybersecurity, Nmap, Risk Scoring
- Git, GitHub, Documentation

CERTIFICATIONS

Big Data

Samsung Innovation Campus, Jan-Mar 2026

DSA

Coding Blocks, Jan 2026

Ethical Hacking

Udemy, Nov 2025

R Language

Udemy, Jul 2025

HTML & CSS

Udemy, Aug 2024

Critical Thinking in AI

HP, Mar 2026

PROFILE SUMMARY

AI & Data Science undergraduate focused on Python backend development, AI tooling, and secure automation. Internship experience includes AI-assisted software development and data analysis. Seeking backend, Python, AI/ML, or cybersecurity internships where I can learn fast, explain my work clearly, and contribute to practical engineering tasks.

WORK EXPERIENCE

Artificial Intelligence Intern

Feb 2026 - Jul 2026

Sukrit Technologies Pvt. Ltd. | Remote

- Worked on AI-assisted software development workflows including coding, debugging, testing, and iterative refinement.
- Collaborated with full-stack project guidance to understand requirements and translate ideas into working implementation steps.
- Built practical familiarity with AI tools used in software engineering while reviewing and improving generated code.

AI & Data Science Intern

Jun 2025 - Jul 2025

Allsoft Solutions & Services (IBM Business Partner) | Delhi

- Analyzed survey and socioeconomic data using EDA, statistical techniques, and visual summaries.
- Prepared stakeholder-friendly reports explaining model evaluation results and poverty-related data patterns.

PROJECTS

Price Guard

FastAPI / React / Playwright

Chrome extension and dashboard that compares shopper-visible prices with fresh-session prices, with JWT auth, SQLite price history, and alert workflows.

LangGraph Issue Solver

Python / LangGraph / LangChain

LLM-assisted workflow for understanding repository issues, planning fixes, and exploring graph-based agent design for developer productivity.

Axon Core

Python / Backend Automation

Backend-oriented project focused on structured processing, application logic, and maintainable secure automation workflows.

SecureScan AI

Python / Streamlit

Threat scanner for leaked credentials, PII, SQL injection, and security patterns with severity scoring and remediation suggestions.

Fortify Docs API

Python / FastAPI

Stateless API for securing PDFs and images with image-to-PDF conversion, permission controls, and in-memory processing.
